### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest circulating of electrolyte from two containers to an electrolyzer and utilizing two different circulation loops depending upon a concentration of the electrolyte in combination with flow paths connecting the two containers. Uzoh et al and Andricacos et al teach a single circulation loop. Ueffinger teaches using one of two different circulation loops depending upon detected metal ion concentration of the electrolyte, but does not teach or suggest utilizing flow paths between the first and second containers of electrolyte.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
